

Bug Report:

Summary: Invalid Security Code.

Description: During Payment process, the user enters invalid security code.

Steps to Reproduce:

1. Go to the Payment page.
2. Enter valid security code (3 digits).
3. Click on the "submit" button.
4. Verify the user payment process.

Expected Result: After successful payment, the user should see a success message. And if the payment process is not successful, error message should appear.

Actual Result: Error message don't appear if invalid input is entered.

Environment:

- Operating System: Windows 10
- Browser: Google Chrome Version 99.0.1234.56

Severity: High

Priority: High

Notes:

- The user receives the confirmation email indicating a successful Payment.

Recommendation:

- Investigate the payment process and ensure that the success message is displayed on the website upon successful payment.
- Investigate the payment process and ensure that the error message is displayed on the website upon unsuccessful payment.
