

Bug Report Example:

Summary: Phone Number out of range.

Description: When entering phone number by the user, the program shows out of range problem.

Steps to Reproduce:

1. User enters his data.
2. User enters his phone number.

Expected Result: After successful Inputs, the user should see a success message on the app.

Actual Result: After successful inputs, the user does not see the expected success message on the app, and out of range error occurs.

Environment:

- Operating System: Windows 11

Severity: Medium

Priority: Medium

Notes:

- This issue prevents the user from getting immediate feedback on the successful registration, leading to potential confusion.

Recommendation:

- Investigate the registration process and ensure that the success message is displayed on the website upon successful registration.
- Update the registration flow to provide the expected success message for better user experience and confirmation.
